公欠の取扱いについて（お知らせ）

昨今の学内におけるオミクロン株の急激な感染の拡大による学内業務の遂行維持の必要性、並びに現行のオミクロン株による症状が比較的軽度であることに鑑み、下記のとおり、陽性者および濃厚接触者（相当含む）の対応が一部変更されました。それに伴い、公欠の取扱い及び新型コロナウイルス感染対応フローを更新しましたので、お知らせします。

なお、PCR 検査・抗原検査をした場合は、大学に報告をしたうえで、公欠届を出すようにしてください。

Changes to Handling of Authorized Absences following the Change to Responses regarding Self-isolation for Those Diagnosed with COVID-19

Amid the acute spread of Omicron variant infections, we have updated our response regarding those diagnosed with COVID-19. The decision is expected to help maintain the manpower required for the Institute to operate properly, and is based on observations that symptoms caused by the variant seem to be generally mild. Accordingly, we have also updated instructions for students regarding authorized absences and what you are required to do in situations related to the disease.

Please note that you must first report your COVID-19 test results to pcrteststudent@jim.titech.ac.jp if you take the COVID-19 test, and to his/her academic supervisor if affiliated with a laboratory, before submitting a Request for Authorized Absence.

Details of changes

● Those who test COVID-19 positive:

(Current) Required to self-isolate at home for one week after completion of the designated treatment period

(New response) Allowed to return to campus immediately after completion of the designated treatment period

- When an individual remains (or is likely to remain) ill at the end of the designated treatment period, the individual may continue to self-isolate at home for an additional week. In such cases, the individual must report to pcrteststudent@jim.titech.ac.jp, and to his/her academic supervisor if affiliated with a laboratory.
- The Health Support Center will not contact the individual at the end of a self-isolation period to confirm health status and the date of return to campus.

● Those deemed equivalent to a close contact:

(Current) Required to self-isolate at home for ten days

(New response) Required to self-isolate at home for one week

The Health Support Center will not contact the individual at the end of a self-isolation period to confirm health status and the date of return to campus. If the individual experiences ill health at the end of the self-isolation period, the individual must report to

pcrteststudent@jim.titech.ac.jp, and to his/her academic supervisor if affiliated with a laboratory.

Regarding the length of absence applicable to students diagnosed with COVID-19

In the case of (1), the absence must continue until all the following conditions are satisfied:

- **The treatment period designated by the relevant Public Health Center has ended.**
- At least 10 days have passed since symptoms first appeared. (The day of the onset of illness is Day 0.)
- At least 3 days have passed since fever and other symptoms* were resolved without the use of medications**. (The day symptoms are resolved is Day 0.)

* Cough, sore throat, shortness of breath, physical fatigue, diarrhea, etc.

** E.g., fever-reducing medications

Points to note:

- **If an individual remains, or is likely to remain, ill at the end of the designated treatment period, the individual may continue to self-isolate at home for an additional week.**
- **If sickness continues after the above self-isolation period, (5) is applicable.**
- Public health centers or medical institutions usually advise individuals to self-monitor their health for four weeks after discharge from hospital or isolation at designated facilities. At Tokyo Tech, students who have been discharged from hospital or isolation are not permitted to come to campuses until the end of a one-week self-monitoring

period, during which they must get adequate rest and ensure that they do not experience a recurrence of symptoms and/or aftereffects of COVID-19.

Regarding the length of absence applicable to students who have symptoms but no known close contact with anyone diagnosed with COVID-19

In the case of (2)-3, the absence must continue until all the following conditions are satisfied if no specific instructions are given by a public health center official or a doctor:

- The student has tested negative for COVID-19.
- At least 8 days have passed since symptoms first appeared. (The day of the onset of illness is Day 0.)
- At least 3 days have passed since fever and other symptoms* were resolved without the use of medications**. (The day symptoms are resolved is Day 0.)

* Cough, sore throat, shortness of breath, physical fatigue, diarrhea, etc.

** E.g., fever-reducing medications

II. Important points to note

- Please see the information concerning “what you should do when you think you might have COVID-19, when you go in for PCR or antigen testing” via the link below.
<https://www.titech.ac.jp/english/student/students/news/2021/060896>
- In principle, authorized absences due to COVID-19 can be granted to students who must miss classes delivered face-to-face. However, under exceptional circumstances such as being hospitalized or self-isolation/quarantine for reason(s) stated in (1) and (2) above, those who must miss classes delivered online may also be granted authorized absences.
- A student requesting authorized absence must download the designated form using the following link:
https://www.titech.ac.jp/english/enrolled/certificates/submitting/forms_current.html
- In the case of (1), (2), or (3), it is recommended that a student who has no symptoms or has mild symptoms submit a Request for Authorized Absence via email during their absence (and supporting documents at a later date), if circumstances allow. As such, the student may be able to receive assignments and course materials from instructors in a timely manner.
- Even if students who miss classes delivered online due to reason (1) or (2) are granted authorized absence, they can choose not to take it and attend classes remotely as long as they feel well enough.
- In the case of (3), where a student has been notified by COCOA regarding contact with someone diagnosed with COVID-19, they must follow instructions displayed on the app screen. Then,

- if it is determined that they require PCR or antigen testing, (2)-1 is applicable.
- if it is determined that they do not require PCR or antigen testing, they are permitted to come to campus. However, they must self-monitor for symptoms for **7 days** following contact with the person diagnosed with COVID-19, and consult a public health center or medical institution for any symptoms associated with COVID-19. If PCR testing is determined appropriate, (2)-1 is applicable.

As a general rule, absences from classes delivered online will not be authorized.

- For absences up to three days due to a fever and/or cold-like symptoms (in the case of (4)), students must contact course instructors directly to obtain assignments and course materials in a timely manner. As a general rule, absences from classes delivered online will not be authorized.
- There may be a case where Tokyo Tech determines that a student has been in a setting equivalent to close contact with a person diagnosed with COVID-19 (as stated in (10) above), based on a report made by the student following instructions provided in “what you should do when you think you might have COVID-19, when you go in for PCR or antigen testing.”
- In the case of (11), where a student with an underlying medical condition is absent from classes, authorized absence will not be granted. It is advisable that they consult a department chair, head of graduate studies, chair of first-year studies, academic supervisor, or academic advisor regarding the range of support Tokyo Tech offers to students.
- In the case of (12), authorized absence will not be granted to a student who is unable to attend classes delivered face-to-face or wishes not to come to campus for any other reasons. It is advisable that they consult a department chair, head of graduate studies, chair of first-year studies, academic supervisor, or academic advisor regarding their study plans.
- Even if authorized absence is granted, when extended absence may affect attainment of course credits, course instructors may refrain from permitting the student to register for the course.
